

The Compatibility Gene

Thursday 2 March 19:00

Hear the remarkable 60 year story of how the discovery of a tiny cluster of 25,000 genes could hold the answer to a revolution in our understanding of health, relationships and our individuality.

*Daniel M Davis, Professor of Immunology,
Director of Manchester Collaborative Centre
for Inflammation Research, Imperial
Alumnus.*

VENUE: Lecture Theatre 1, SAF Building, South Kensington Campus, Imperial College London
